

OIT #0431-86
5 June 1986

NOTE FOR: DDO

FROM:

Deputy Director/OIT-Management

Clair:

We are forming an Advanced Workstation Branch in OIT to help sort out Agency requirements for such a device and to select hardware that is appropriate to the varied work styles of the directorates. The branch would do a better job if you were represented there full-time by someone who knows your business and has some orientation toward personal computer technology. If you would like to send someone on rotation, we would be pleased to review candidate files. We can accept GS-12 through GS-14 candidates. Again, because this will entail work on the higher end of workstation technology, it would be helpful if your nominee had some experience with PCs and their more sophisticated uses.
